CLUB ACTIVITY

REPORT

Name of Club: AEP Club

Name of Activity: Preventing and Treating

Day & Date: Friday, 25th July, 2024

Title: Preventing and Treating Substance Abuse.

The Adolescent Education Program (AEP) club recognizes the importance of preventing and treating substance abuse among Class IX & X students. Substance abuse not only affects one's health but also hampers career prospects. Therefore, raising awareness about its adverse effects is crucial.

The primary objective of our initiative is to educate students about the dangers of substance abuse and empower them to make informed decisions for a healthier future. Through this project, we aim to foster a sense of responsibility towards one's well-being among students. Students will create posters highlighting the effects of substance abuse on adolescence, focusing on both health and career implications. Students will present their posters and share information about the importance of avoiding substance abuse.

Learning Outcomes:

1. Students will gain a deeper understanding of the adverse effects of substance abuse on their health and future prospects.
2. Through discussions and workshops, students will develop critical thinking skills and learn to make informed decisions regarding substance use.
3. By actively participating in the campaign, students will feel empowered to take control of their lives and resist peer pressure to engage in substance abuse.
4. Students will become advocates for substance abuse prevention within their peer groups, fostering a culture of support and responsibility.
